

Healthy Volunteers

A Study to Investigate the Safety, Tolerability, and Pharmacokinetics of RO7079901 and the Combination of RO7079901 With Meropenem in Adult Healthy Volunteers

Trial Status
Completed

Trial Runs In
1 Countries

Trial Identifier
NCT02972255 NP30052

The source of the below information is the publicly available website ClinicalTrials.gov. It has been summarised and edited into simpler language.

Trial Summary:

This is a randomized, double-blind, placebo-controlled, multiple-ascending dose (MAD) study that will evaluate the safety, tolerability and pharmacokinetics (PK) of RO7079901 and the combination of RO7079901 with meropenem in healthy volunteers. The study will consist of three parts (Part I, II, and III). At each dose level/cohort, a total of 8 healthy volunteers will be randomized to receive active study drug or placebo in a 3:1 ratio.
