Trial Summary:

This is a multi-center, non-randomized, open-label, two-part study to investigate the effect of renal function and hemodialysis on PK of RO7079901. Part 1 will be conducted in adult male and female participants with stable mild, moderate or severe renal impairment and a control group of participants with normal renal function. Part 2 will be conducted in adult male and female participants with stable end-stage renal disease undergoing hemodialysis.
