Trial Summary:

This is an open-label, non-randomized study investigating the excretion balance, PK and metabolism of a single oral dose of [14C]-labeled Risdiplam (RO7034067) in healthy male participants. This study will assess the characterize mass balance, routes and rates of elimination of [14C]-labeled Risdiplam (RO7034067), using conventional analytical methods and assess the pharmacokinetics of total drug related [14C]-radioactivity, Risdiplam (RO7034067) and its metabolite(s).
