Lymphoma Non Hodgkin Lymphoma (NHL)

A Study of Atezolizumab in Combination With an Immunotherapy Agent Investigated With or Without Anti-Cd20 Therapy in Patients With Relapsed or Refractory Non-Hodgkin Lymphoma

Trial Status
Withdrawn

Trial Runs In
1 Countries

Trial Identifier
NCT03369964 2017-002587-41
GO40150

The source of the below information is the publicly available website [ClinicalTrials.gov](https://clinicaltrials.gov). It has been summarised and edited into simpler language.

Trial Summary:

This study will investigate the safety, pharmacology, and activity of atezolizumab in combination with immunotherapy agents with or without an anti-CD20 agent (i.e., obinutuzumab) in patients with relapsed or refractory (R/R) follicular lymphoma (FL). The first immunotherapy molecule investigated will be emactuzumab (Arm A) in two combinations.
